

Distributor rotor metal contacts strip — paper template

Print to scale
1"

Flat-pattern cutting template

extra copies

You may modify these dimensions to fit your rotor.

Material: Stainless steel or brass sheet or 1"-wide strip, very thin: $\sim 0.01"$ (~ 0.3 mm).

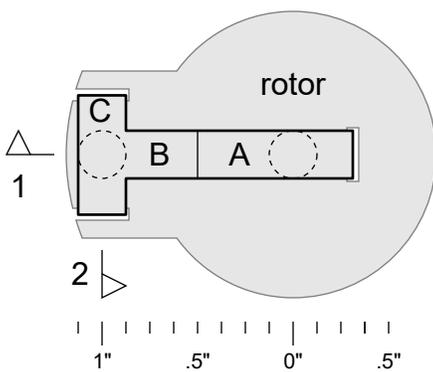

Cut the T-shaped flat pattern from the thin metal sheet.

Sand all sharp edges and corners.

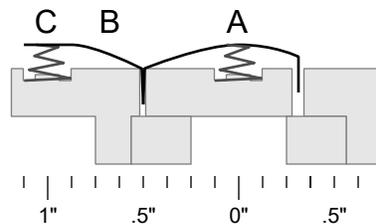

Hammer slight bumps at centers of contact points.

Fold and bend as shown in the drawings.
